**This Appendix I nullifies and replaces any previous Appendix I**

*Processing incentive for oil and antifreeze plastic containers involving decontamination.*

### ***Effective rates for collection made on and after January 01, 2026***

A variable incentive will be paid to processors of oil and antifreeze plastic containers whose process consists of cleaning containers for re-use, or whose process includes shredding, decontamination, and reducing into pellets prior to transformation into finished goods. This incentive aims to recognize that both these processes are not yet profitable. **Nonetheless, shredding alone cannot be considered processing.**

The variable incentive rate will be determined based on the price of virgin resin in<sup>1</sup> accordance with the following chart:

Average price of virgin resin in the last 3 months (\$CAD/KG)	Plastic containers process incentive (\$CAD/KG)
Less than \$1.20	\$0.40
\$1.20 to \$1.39	\$0.35
\$1.40 to \$1.59	\$0.30
\$1.60 to \$1.79	\$0.25

\$2.20 to \$2.39	\$0.10
\$2.40 and more	\$0.00

Note 1: *The price of virgin resin will be determined based on the average quarterly price of HDPE Medium Quality, Injection Molding, CDI, Assessment, Hopper Car, Month, Contract Survey, Monthly from ICIS, in Canadian dollars per kilogram.*
